## **Network Secuirty MCQ Questions and Answers Pdf**

a. message digest b. message summary c. message confidentiality d. none of these	1.	A(ı	n) can be used to preserve the integrity of a document or a message.
c. message confidentiality d. none of these     Ans: A  2. DES was adopter in the year     a. 1986     b. 1968     c. 1977     d. 1982     Ans: C  3. Triple DEA was first proposed by     a. Tuchman     b. Fredick     c. Nauman     d. Dennis     Ans: A  4. DES means     a. Data Encryption Standard     b. Digital Encryption Standard     c. Data Encoding Scheme     d. None of these     Ans: A  5. The physical form of money is converted into     a. octal form     b. hexadecimal     c. decimal     d. binary form     Ans: D  6. A digital signature needs a(n) system.     a. symmetric key     b. asymmetric key		a.	message digest
d. none of these    Ans: A  2. DES was adopter in the year    a. 1986    b. 1968    c. 1977    d. 1982    Ans: C  3. Triple DEA was first proposed by    a. Tuchman    b. Fredick    c. Nauman    d. Dennis    Ans: A  4. DES means    a. Data Encryption Standard    b. Digital Encryption Standard    c. Data Encoding Scheme    d. None of these    Ans: A  5. The physical form of money is converted into    a. octal form    b. hexadecimal    c. decimal    d. binary form    Ans: D  6. A digital signature needs a(n) system.    a. symmetric key    b. asymmetric key		b.	message summary
Ans: A  2. DES was adopter in the year a. 1986 b. 1968 c. 1977 d. 1982 Ans: C  3. Triple DEA was first proposed by a. Tuchman b. Fredick c. Nauman d. Dennis Ans: A  4. DES means a. Data Encryption Standard b. Digital Encryption Standard c. Data Encoding Scheme d. None of these Ans: A  5. The physical form of money is converted into a. octal form b. hexadecimal c. decimal d. binary form Ans: D  6. A digital signature needs a(n) system. a. symmetric key b. asymmetric key		c.	message confidentiality
<ul> <li>2. DES was adopter in the year <ul> <li>a. 1986</li> <li>b. 1968</li> <li>c. 1977</li> <li>d. 1982 <ul> <li>Ans: C</li> </ul> </li> <li>3. Triple DEA was first proposed by <ul> <li>a. Tuchman</li> <li>b. Fredick</li> <li>c. Nauman</li> <li>d. Dennis <ul> <li>Ans: A</li> </ul> </li> <li>4. DES means</li> <li>a. Data Encryption Standard</li> <li>b. Digital Encryption Standard</li> <li>c. Data Encoding Scheme</li> <li>d. None of these <ul> <li>Ans: A</li> </ul> </li> <li>5. The physical form of money is converted into</li> <li>a. octal form</li> <li>b. hexadecimal</li> <li>c. decimal</li> <li>d. binary form <ul> <li>Ans: D</li> </ul> </li> <li>6. A digital signature needs a(n) system.</li> <li>a. symmetric key</li> <li>b. asymmetric key</li> </ul> </li> </ul></li></ul>		d.	none of these
a. 1986 b. 1968 c. 1977 d. 1982 Ans: C  3. Triple DEA was first proposed by a. Tuchman b. Fredick c. Nauman d. Dennis Ans: A  4. DES means a. Data Encryption Standard b. Digital Encryption Standard c. Data Encoding Scheme d. None of these Ans: A  5. The physical form of money is converted into a. octal form b. hexadecimal c. decimal d. binary form Ans: D  6. A digital signature needs a(n) system. a. symmetric key b. asymmetric key			Ans: A
b. 1968 c. 1977 d. 1982    Ans: C  3. Triple DEA was first proposed by    a. Tuchman    b. Fredick    c. Nauman    d. Dennis    Ans: A  4. DES means    a. Data Encryption Standard    b. Digital Encryption Standard    c. Data Encoding Scheme    d. None of these    Ans: A  5. The physical form of money is converted into    a. octal form    b. hexadecimal    c. decimal    d. binary form    Ans: D  6. A digital signature needs a(n) system.    a. symmetric key    b. asymmetric key	2.	DE	ES was adopter in the year
c. 1977 d. 1982 Ans: C  3. Triple DEA was first proposed by a. Tuchman b. Fredick c. Nauman d. Dennis Ans: A  4. DES means a. Data Encryption Standard b. Digital Encryption Standard c. Data Encoding Scheme d. None of these Ans: A  5. The physical form of money is converted into a. octal form b. hexadecimal c. decimal d. binary form Ans: D  6. A digital signature needs a(n) system. a. symmetric key b. asymmetric key		a.	1986
d. 1982 Ans: C  3. Triple DEA was first proposed by a. Tuchman b. Fredick c. Nauman d. Dennis Ans: A  4. DES means a. Data Encryption Standard b. Digital Encryption Standard c. Data Encoding Scheme d. None of these Ans: A  5. The physical form of money is converted into a. octal form b. hexadecimal c. decimal d. binary form Ans: D  6. A digital signature needs a(n) system. a. symmetric key b. asymmetric key		b.	1968
Ans: C  3. Triple DEA was first proposed by a. Tuchman b. Fredick c. Nauman d. Dennis Ans: A  4. DES means a. Data Encryption Standard b. Digital Encryption Standard c. Data Encoding Scheme d. None of these Ans: A  5. The physical form of money is converted into a. octal form b. hexadecimal c. decimal d. binary form Ans: D  6. A digital signature needs a(n) system. a. symmetric key b. asymmetric key		c.	1977
<ul> <li>3. Triple DEA was first proposed by <ul> <li>a. Tuchman</li> <li>b. Fredick</li> <li>c. Nauman</li> <li>d. Dennis <ul> <li>Ans: A</li> </ul> </li> <li>4. DES means <ul> <li>a. Data Encryption Standard</li> <li>b. Digital Encryption Standard</li> <li>c. Data Encoding Scheme</li> <li>d. None of these <ul> <li>Ans: A</li> </ul> </li> <li>5. The physical form of money is converted into</li> <li>a. octal form</li> <li>b. hexadecimal</li> <li>c. decimal</li> <li>d. binary form <ul> <li>Ans: D</li> </ul> </li> <li>6. A digital signature needs a(n) system.</li> <li>a. symmetric key</li> <li>b. asymmetric key</li> </ul> </li> </ul></li></ul>		d.	1982
a. Tuchman b. Fredick c. Nauman d. Dennis     Ans: A 4. DES means a. Data Encryption Standard b. Digital Encryption Standard c. Data Encoding Scheme d. None of these     Ans: A 5. The physical form of money is converted into a. octal form b. hexadecimal c. decimal d. binary form     Ans: D 6. A digital signature needs a(n) system. a. symmetric key b. asymmetric key			Ans: C
<ul> <li>b. Fredick</li> <li>c. Nauman</li> <li>d. Dennis      Ans: A</li> <li>4. DES means      a. Data Encryption Standard</li> <li>b. Digital Encryption Standard</li> <li>c. Data Encoding Scheme</li> <li>d. None of these      Ans: A</li> <li>5. The physical form of money is converted into      a. octal form      b. hexadecimal      c. decimal      d. binary form      Ans: D</li> <li>6. A digital signature needs a(n) system.      a. symmetric key</li> <li>b. asymmetric key</li> </ul>	3.	Tr	iple DEA was first proposed by
c. Nauman d. Dennis     Ans: A  4. DES means a. Data Encryption Standard b. Digital Encryption Standard c. Data Encoding Scheme d. None of these     Ans: A  5. The physical form of money is converted into a. octal form b. hexadecimal c. decimal d. binary form     Ans: D  6. A digital signature needs a(n) system. a. symmetric key b. asymmetric key		a.	Tuchman
d. Dennis    Ans: A  4. DES means    a. Data Encryption Standard    b. Digital Encryption Standard    c. Data Encoding Scheme    d. None of these     Ans: A  5. The physical form of money is converted into    a. octal form    b. hexadecimal    c. decimal    d. binary form    Ans: D  6. A digital signature needs a(n) system.    a. symmetric key    b. asymmetric key		b.	Fredick
Ans: A  4. DES means a. Data Encryption Standard b. Digital Encryption Standard c. Data Encoding Scheme d. None of these     Ans: A  5. The physical form of money is converted into a. octal form b. hexadecimal c. decimal d. binary form     Ans: D  6. A digital signature needs a(n) system. a. symmetric key b. asymmetric key		c.	Nauman
<ul> <li>4. DES means <ul> <li>a. Data Encryption Standard</li> <li>b. Digital Encryption Standard</li> <li>c. Data Encoding Scheme</li> <li>d. None of these <ul> <li>Ans: A</li> </ul> </li> <li>5. The physical form of money is converted into</li> <li>a. octal form</li> <li>b. hexadecimal</li> <li>c. decimal</li> <li>d. binary form <ul> <li>Ans: D</li> </ul> </li> <li>6. A digital signature needs a(n) system.</li> <li>a. symmetric key</li> <li>b. asymmetric key</li> </ul> </li> </ul>		d.	Dennis
<ul> <li>a. Data Encryption Standard</li> <li>b. Digital Encryption Standard</li> <li>c. Data Encoding Scheme</li> <li>d. None of these</li></ul>			Ans: A
<ul> <li>b. Digital Encryption Standard</li> <li>c. Data Encoding Scheme</li> <li>d. None of these</li></ul>	4.	DE	
<ul> <li>c. Data Encoding Scheme</li> <li>d. None of these</li></ul>		a.	
<ul> <li>d. None of these</li></ul>		b.	
Ans: A  5. The physical form of money is converted into  a. octal form  b. hexadecimal  c. decimal  d. binary form  Ans: D  6. A digital signature needs a(n) system.  a. symmetric key  b. asymmetric key			
<ul> <li>5. The physical form of money is converted into</li> <li>a. octal form</li> <li>b. hexadecimal</li> <li>c. decimal</li> <li>d. binary form  Ans: D</li> <li>6. A digital signature needs a(n) system.</li> <li>a. symmetric key</li> <li>b. asymmetric key</li> </ul>		d.	
<ul> <li>a. octal form</li> <li>b. hexadecimal</li> <li>c. decimal</li> <li>d. binary form Ans: D</li> <li>6. A digital signature needs a(n) system. <ul> <li>a. symmetric key</li> <li>b. asymmetric key</li> </ul> </li> </ul>			
<ul> <li>b. hexadecimal</li> <li>c. decimal</li> <li>d. binary form Ans: D</li> <li>6. A digital signature needs a(n) system. a. symmetric key</li> <li>b. asymmetric key</li> </ul>	5.		
<ul> <li>c. decimal</li> <li>d. binary form</li> <li>Ans: D</li> <li>6. A digital signature needs a(n) system.</li> <li>a. symmetric key</li> <li>b. asymmetric key</li> </ul>			
<ul> <li>d. binary form</li></ul>		`	
Ans: D  6. A digital signature needs a(n) system. a. symmetric key b. asymmetric key			
<ul><li>6. A digital signature needs a(n) system.</li><li>a. symmetric key</li><li>b. asymmetric key</li></ul>		d.	
<ul><li>a. symmetric key</li><li>b. asymmetric key</li></ul>	_		
b. asymmetric key	6.		
•			
c. eitner a or b			•
		C.	either a or b

d. neither a or b	
Ans: B	
7. Message means that the data must arrive at the receiver exactly as sent.	
a. confidentiality	
b. integrity	
c. authentication	
d. none of these	
Anms: B	
8. The study of encryption method is known as	
a. demography	
b. cryptography	
c. biometric	
d. none of these	
Ans: B	
9. Conventional encryption also referred to as	
a. symmetric encryption	
b. single key encryption	
c. secret key encryption	
d. all of these	
Ans: B	
10 is an encryption/decryption key known only to the party or parties that	
exchange secret messages.	
a. E-signature	
b. Digital certificate	
c. Private key	
d. Security token	
Ans: C
